# School of Engineering: Calculator Policy for Exams

The School of Engineering has a calculator policy for incoming students, effective September 2019. During midterm and final exams, the two permitted models of calculators are:

Texas Instruments TI-36X Pro	CASIO fx-991ES PLUS C*

Both calculators will be available through the bookstore. They both have the following functionalities:

- solar + battery powered
- "natural" 4-line display
- standard scientific operations (trig, hyp, exp, log, etc.)
- complex numbers
- numerical solver
- roots of quadratic and cubic polynomials
- simultaneous linear equations (up to 3 unknowns)
- vector and matrix operations (real valued, up to 3x3)

- numerical integrals and derivatives
- statistics, regressions, and distributions
- base 2, 8, 10, 16
- stored variables and operations
- constants and conversions

- NOT programmable
- NOT graphing capable
- NO wireless functions
- NO file storage
